Soil : *The 35 years old vines are planted on a clay limestone soil, on a hillside, which gives the berries their maturity.*

Vineyard area : *5ha.*

Vine yield : *35hecto/hectare.*

Vine growing : *The planting density is about 4500 plant per hectare, we work our soils mechanically and practice reasoned agriculture on the property since 1990. We do a short pruning in order to reduce our yields and obtain the best quality for our berries.*

Winemaking : *The harvest is done mechanically, then we use a sorting table at the winery and temperature control to follow. We realize a long maceration of 10 weeks to produce colorful wines focused on flavours. The wine is then aged in oak barrel for a period of 40 months before bottling.*

Production : *3386 Bottles*
