CABERNET SAUVIGNON

Maulin Vineyard, Montussan, France

CHÂTEAU FREYNEAU

M

Soil : *The 35 years old vines are planted on a clay limestone soil, on a hillside, which gives the berries their maturity.*

Vineyard area : 12ha.

Vine yield : 38hecto/hectare.

Vine growing : *The planting density is about 4500 plant per hectare, we work our soils mechanically and practice reasoned agriculture on the property since 1990. We do a short pruning in order to reduce our yields and obtain the best quality for our berries.*

Winemaking : *The harvest is done mechanically, then we use a sorting table at the winery and temperature control to follow. We realize a long maceration of 8 weeks to produce colorful wines focused on flavours. The wine is then aged in vats for a period of 18 months before bottling.*

Production : 60 000 Bottles

ALCOHOL 14 % BY VOL. 750 ML
