*Soil : Plot of land planted on a clay-limestone soil. Selected terroir favourable to the qualitative development of Petit-Verdot.*

*Vineyard area : 2,95ha.*

*Vine yield : 35hecto/hectare.*

*Vine growing : The planting density is about 4500 plant per hectare, we work our soils mechanically and practice reasoned agriculture on the property since 1990. We do a short pruning in order to reduce our yields and obtain the best quality for our berries.*

*Winemaking : The harvest is done mechanically, then we use a sorting table at the winery and temperature control to follow. We realize a long maceration of 8 weeks to produce colorful wines focused on flavours.*

*Production : 14 000 Bottles*

**ALCOHOL 14,0 % BY VOL. 750 ML**
